

We Care About Sharks

We do not serve shark fin soup and we want to share with you our reasons why:

- 1/3 of all shark species are threatened with extinction
- Fins are sliced off of tens of millions of sharks each year, sometimes while they are still alive
- Sharks are vital to the health of marine ecosystems, and their disappearance is compromising the health of our oceans
- Shark meat is not healthy and may contain heavy metals like mercury and neurotoxins linked to degenerative brain diseases.

We think sharks need to be protected, and are proud to say that we are FINished with FINS. To learn more about threats facing sharks please visit www.Sharksavers.org

I'm **FIN**ished
