

# SEEK A SHARK

There are over 400 species of sharks. There is a great degree of diversity among shark species and many sharks have some very cool and interesting traits. These are some of the more common species of sharks - see how many you know.

- ATLANTIC
- BASKING
- BLACKTIP
- CARPET
- COW
- DUSKY
- GREAT WHITE
- GROUND
- HAMMERHEAD
- LANTERN
- LEOPARD
- MAKO
- NURSE
- PRICKLY
- PYGMY
- REEF
- SANDTIGER
- SEVENGILL
- SILKY
- THRESHER
- WEASEL
- WHITETIP
- ZEBRA

Search for the following shark species in the chart below. Words are hidden in any direction. Circle the entire name once you find it and cross it off the list.

## FAST FACTS

The Bull Shark is able to live in both salt and freshwater. They have been found in some lakes and miles up rivers. Most sharks can only live in saltwater because they cannot control the salt in their body when the amount of salt changes in the water where they swim. But Bull Sharks have evolved to handle just that.
